

SUBHAN MAJIDOV

Junior Web Application Penetration Tester

Baku, Azerbaijan | +994 51 776 65 64 | subhanmajidov@gmail.com

[LinkedIn](#) | [GitHub](#) | [TryHackMe](#) | [Hack The Box](#)

PROFESSIONAL SUMMARY

Security-focused IT student and hands-on web application penetration tester trained at IDTech Academy. Proficient in the OWASP Top 10, Burp Suite, and secure code review across Python, Java, PHP and JavaScript. Now seeking a Jr Penetration Tester role to help ship secure software, not just break it.

TECHNICAL SKILLS

Web Application Security: OWASP Top 10, SQL Injection, NoSQL Injection, Cross-Site Scripting, DOM-based Vulnerabilities, CSRF, CORS Misconfiguration, Clickjacking, IDOR, Broken Access Control, Privilege Escalation, Business Logic Vulnerabilities, Information Disclosure, Server-Side Template Injection (SSTI), XML External Entity (XXE) Injection, Server-Side Request Forgery (SSRF), Path Traversal, Local File Inclusion (LFI), OS Command Injection, Unrestricted File Upload, Remote Code Execution (RCE), Insecure Deserialization, Prototype Pollution, Mass Assignment, Race Conditions, HTTP Request Smuggling, HTTP Host Header Attacks, Web Cache Poisoning, Web Cache Deception

Authentication & Session Security: Authentication Vulnerabilities, JWT Attacks, OAuth 2.0 Vulnerabilities, OTP / MFA Bypass, Password Reset Token Analysis, Session Fixation, Credential Brute Force, Username Enumeration, Rate-Limiting Assessment, Cookie Attribute Security

API & Mobile Security: REST API Penetration Testing, GraphQL API Vulnerabilities, Mobile API / Token-Based Authentication Testing, WebSocket Security Testing, Web LLM / Prompt Injection Attacks, Mobile Application Penetration Testing

Reconnaissance & Enumeration: DNS & Subdomain Enumeration, Directory & Endpoint Fuzzing, Port Scanning, Service Enumeration, HTTP Header Analysis, Technology Fingerprinting

Methodology & Reporting: OWASP Web Security Testing Guide (WSTG), OWASP Top 10 (2025), CVSS Risk Scoring, Penetration Test Report Writing, Proof-of-Concept Development, Vulnerability Chaining, Root-Cause Analysis, Remediation Guidance, Secure Code Review

Security Tools: Burp Suite (Proxy, Repeater, Intruder), Nmap, Gobuster, FFUF, Dirsearch, SQLMap, curl

Programming & Scripting: Python, Java, PHP, JavaScript, HTML, CSS

Networking: TCP/IP, OSI Model, DNS, DHCP, HTTP/HTTPS, SSH, FTP

PROJECTS & PORTFOLIO

Web Application Penetration Test — Meridian Corp Staff Portal (Final Course Assessment) August 2026

- Two-day black-box test of a PHP staff portal and mobile API; identified and manually exploited 27 vulnerabilities (5 Critical, 9 High) without automated scanners.
- Demonstrated RCE (file upload chained with LFI, SSTI), unauthenticated account takeover, JWT alg:none bypass, SQL injection, insecure deserialization and IDOR.
- Authored a 100-page report following OWASP WSTG with CVSS-rated findings, root-cause analysis and a prioritised remediation roadmap.
- Report: github.com/SubhanMajidov/security-portfolio

Web Application Penetration Test — ByteBazar E-commerce Platform (IDTech Academy Lab) June 2026

- 2-hour black-box test of an e-commerce app and REST API; identified 12 vulnerabilities (5 Critical, 6 High) mapped to CWE and OWASP Top 10.
- Escalated to administrator via mass assignment, JWT alg:none and missing admin authorization; chained login and OTP brute force into full admin account takeover.
- Delivered a 28-page report with reproduction steps, evidence, impact and a phased remediation plan.
- Report: github.com/SubhanMajidov/security-portfolio

WORK EXPERIENCE

International IT/AV Technician (On-site)

May 2026

World Urban Forum 13 (WUF13) — Baku, Azerbaijan

- Configured and supported enterprise audio-visual infrastructure for an international conference.
- Troubleshoot hardware and connectivity issues under strict operational deadlines.
- Collaborated with multinational technical teams to ensure uninterrupted event operations.

EDUCATION

Bachelor of Information Technologies (BIT)

September 2023 – Expected 2027

Azerbaijan State Oil and Industry University (ASOIU) — Baku, Azerbaijan

Offensive Security: Web & Mobile Penetration Testing

April 2026 – August 2026

IDTech Academy — Baku, Azerbaijan | Completed with High Honor | Instructor: Aydin Gurbanli

- Coursework: web application and mobile application penetration testing, OWASP Top 10, Burp Suite, authentication and access control testing, secure code review.
- Capstone: two-day black-box penetration test and 100-page professional report (see Projects & Portfolio).

CERTIFICATIONS

- **Cybersecurity — Certificate of Completion with High Honor** — IDTech Academy: [\(Verification\)](#) August 2026
- **Jr Penetration Tester** — TryHackMe: [\(Verification\)](#)

LANGUAGES

Azerbaijani (Native), English (Upper-Intermediate), Spanish (Basic)
